12 3000 9.0 7.0 60
VOLT AMP PETROL DIESEL STARTS

Are you tired of all the cheap rubbish on the market?
This is a quality unit with a quality list of features.
You won't be disappointed!

SAFETY AND INTELLIGENT

This LOKITHOR J402 lithium battery jump starter is capable of detecting the voltage of the car battery in real-time and sounding an alarm for abnormal conditions. The top rated jump starter is built with the latest battery management system and is equipped with various safety features, including short-circuit protection, over-current protection, reverse connection protection, over-heat protection, over-time protection, spark-proof technology, and clip-falling-off protection.

ADAPT TO EXTREMELY ENVIRONMENT

This LOKITHOR J402 lithium battery jump starter is a high-performance jump starter that is equipped with an advanced smart BMS (Battery Management System) that can adapt to extreme environments, ensuring reliable and efficient performance even in the toughest conditions. Its mistake-proof design includes essential safety features such as reverse polarity and spark-proof technology.

100W TWO-WAY FAST CHARGING

The LOKITHOR J402 multi purpose jump starter battery is a high-performance jump starter that features a powerful 100W two-way fast charging system, enabling a full charge in just 54 minutes. With its 5-minute charge feature, the J402 jump starter can provide a quick jump-start, making it a reliable and efficient solution for emergency situations.

LOKITHOR
